

The Antivirus Solution for Windows

**DATASHEET
HOME**

- Significantly enhanced, advanced heuristics technology to defend against new and unknown threats.
- Automatic real-time protection of all file types, including archives, ActiveX controls and e-mails.
- Fast and light automatic updates and upgrades.
- Quarantine to isolate infected or suspicious files.
- Exclusion of files, folders and extensions for automatic and manual scan.
- Redesigned user-friendly interface.

F-PROT Antivirus for Windows, built on the award-winning F-PROT Antivirus scanning engine, is one of the most advanced antivirus software applications on the market today. Fast, reliable and easy to use, F-PROT Antivirus for Windows removes viruses, worms and trojans and other malware from files and e-mails automatically and in realtime. New and unknown threats are detected with F-PROT Antivirus advanced heuristics technology, providing the strongest possible defence available for your laptops and your desktops.

F-PROT Antivirus for Windows builds on its traditional competitive advantage of reliability, ease of use and exceptionally low resource consumption to provide a uniquely secure, efficient and usable, yet affordable, antivirus solution.

F-PROT Antivirus automatically downloads updates and program upgrades from the internet, thus requiring low level maintenance on the user's behalf. Although easy-to-use, F-PROT Antivirus still offers a number of features for the advanced user, including exclusion of files, folders and extensions and a powerful command-line scanner.

Key benefits

- Award-winning F-PROT Antivirus scanning engine.
- Up-to-date antivirus protection of all files and e-mails.
- One license covers up to five computers in a home.
- Automatic updates and upgrades included.
- Outstanding speed, high detection results and low resource consumption.
- Easy to install and simple to use.
- Speedy and effective 24/7 virus outbreak response, by F-PROT Antivirus virus laboratory experts
- Excellent customer service and technical support online at www.f-prot.com and via e-mail at support@f-prot.com.

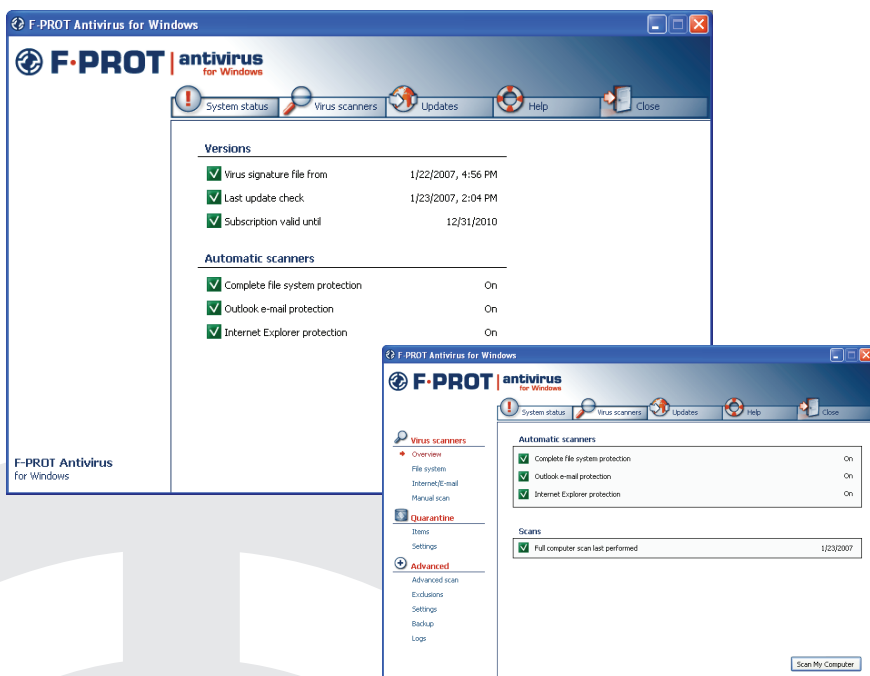

Key features

- Automatic removal of viruses, worms and trojans and other malicious software.
- State-of-the-art heuristics technology defends against new and unknown threats.
- Automatic scanners that monitor all files whenever they are accessed, created or copied.
- Automatic updates and upgrades.
- Quarantine to isolate infected or suspicious files.
- Exclusion of files, folders and extensions for automatic and manual scan.
- Powerful command-line virus scanning for advanced users.

Sophisticated Scanning Options

F-PROT Antivirus for Windows provides a variety of scanning tools and options.

- **Automatic file system protection** scans and disinfects all kinds of files, including archives, ActiveX controls and e-mails, as they are accessed, created or copied.
- **Automatic ActiveX protection** scans and disinfects malicious ActiveX controls via Internet Explorer. Other browsers are supported via the automatic file system protection.
- **Automatic e-mail protection** scans and cleans e-mails in Microsoft Outlook. Other e-mail clients are supported via the automatic file system protection.
- **Manual scan** launches scans on demand.
- **Command-Line Scanner** is an advanced command-line tool for computer professionals.

The User Interface

F-PROT Antivirus has a simple and elegant graphical interface. Monitoring the system status, general maintenance and scanning is made easy for the average home user. Although easy-to-use, F-PROT Antivirus for Windows also offers a variety of settings for the advanced user, meeting technological needs for specific tasks.
